

VENTS THAT PERFECTLY MATCH YOUR ROOF.

Introducing the roof-venting system that not only matches the colour and finish of your Gerard roof, but saves on plumbing costs too. Your Gerard Certified Roofer can install the vents as part of the roof which means your plumber only has to connect from the inside. There's no need to add flashings and pipes that could compromise weathertightness.

 **GERARD**
Roofing Designed to Endure

TWO NEW VENTS THAT SUIT MOST ROOFING SITUATIONS.

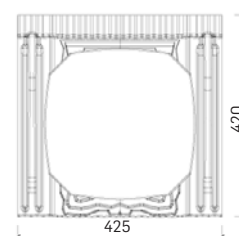

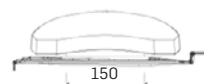

GERARD FREE-FLOW PORT

A low-profile vent intended to cap off general extraction systems from kitchens, bathrooms and laundries; with a free vent area of 20,000mm² it's also ideal for airflow and heat circulation in roof cavities. The unit comes with a 100-150mm stepped adaptor that fits most ducting.

Ducting Multi adaptor suitable for use with Ø 150/ 130/ 125/ 110/ 100mm

Size Fits matched Gerard profile

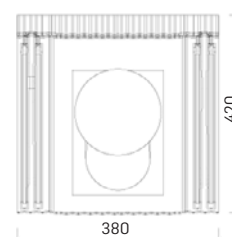

GERARD SANITARY PORT

This accessory is primarily intended to vent sewage systems, but can also be used for general air/moisture extraction from kitchens, bathrooms and laundries – anywhere that fits 100mm ducting. The unit is supplied with a flexible connector so it can be easily fitted to fixed sanitary piping.

Ducting 100mm

Size Fits matched Gerard profile
