

PRODUCT BENEFITS

Proven track record

With a track record of proven results for over 14 years, our product is trusted by professionals for its effectiveness.

Specially formulated

Specially formulated to tackle moss, mould, and lichen on a wide range of exterior surfaces.

Clean and pristine

It ensures that the exterior of your home stays clean and pristine. Choose a solution that has stood the test of time and let us help you maintain the beauty of your home.

APPLICATION

- ⊗ Do not mix with other chemicals.
- ⊗ Do not apply if rain is expected within 12 hours.
- ✓ Add 1 part of MossBoss to 4 parts of clean water. 5 litres of MossBoss makes 25 litres of usable concentrate. Stir well to ensure complete mixing.
- ✓ Apply with a low pressure garden sprayer. Best applied in dry, overcast conditions. Thoroughly wet the surface and walk away. Leave for a few days and remove the dead growth with a stiff brush or high pressure hose. Otherwise simply let the moss, lichen, algae and mould die and erode away with the weather. MossBoss does not show immediate results but it works slowly and effectively without damaging the surface. When the roof is used for collection of drinkable water, ensure that the downpipes are disconnected for 3 – 4 downpours of heavy rain or 6mm of rain to remove the concentrate.

COVERAGE

- i Coverage will depend on the amount of growth to be cleaned.
- i On porous surfaces 1 litre will cover approximately 5 square meters and up to 10 square meters on non porous surfaces.

Refer to MSDS for handling instructions. Results can take up to 6-8 weeks to show. Some applications may require two coats.
